Subject: RE: RE: SOT poster, publications

Dear Valerie:

At INBIFO we have two databases with bibliographic information:

First, we have DOCUMENTUM - a full text retrieval database also used in Neuchatel - for institution-wide access. The database includes all the literature ordered by our scientists and INBIFO/CRC publications with bibliographic information and PDF files for full text retrieval. Hedda Jachimsky is responsible for input into and administration of DOCUMENTUM. This database is used for citations in study protocols/reports.

Second, I maintain an MS Access database only for INBIFO/CRC publications. It was established a few years ago because of several special requirements by Wolf Reininghaus for tracking, sorting, and planning of publications. The database contains hyperlinks to the PDF files in DOCUMENTUM. If you use MS access I can send you a copy of my database (without the hyperlinks) including queries and reports.

I hope this information is of help to you.

Best regards,
Barbara

Dear Barbara:
Thanks very much for the files and your note. Regarding the request for publications information from 1990 and after, that information can be sent to my attention (instead of Loreen).

Related to that request, Rick has indicated that he would like us to derive a process so that we have a centralized resource from which to gather information about WSA publications (including those of INBIFO). I think the information Rick wants already exists in various locations, the task is finding the most efficient way to bring it together so as to mimimize additional work needed.

I have spoken briefly with Kathy Mitchell in the library here regarding Richmond and Neuchatel publications (since they are covered by the manuscript review process here in Richmond), but I am also interested in finding out how INBIFO tracks its external publications.

How is the bibliographic information on these external publications maintained? Does it exist in a reference database such as Endnote where a file could be exported? Any information you can provide would be appreciated.

Best regards,
Valerie

(1) Please find attached 3 out of 4 SOT 2001 posters. The poster presented by Birgit Gerstenberg will be sent later due to technical problems during conversion to PDF format.

(2) For your and Loreen's information:
I'm the responsible person for administration (especially the electronic form of administration) - in coordination with Lynda Conroy, Hedda Jachimsky, Baerbel Greiner-Adam - of external publications.

To date, I'm working on Loreen's request for electronic copies of publications/presentations/posters from 1990 and after. I'm trying to send the first part of the collection next week.

Please don't hesitate to contact me, if you have any questions regarding INBIFO/CRC publications.

Best regards,
Barbara

Dear Hans-Juergen:
Will we be able to obtain pdf files of the final posters presented (similar to that which have in the shared folder for 1998 and 2000 SOT presentations)?

Also, can you tell me who manages tracking of INBIFO's external publications (including poster presentations)? Is this handled in the library (by Hedda)? Please advise.

Kind regards,
Valerie
